

Water Treatment Filter Cartridge

- 1.True depth filter,uses graded density that allows larger particles to be trapped near surface and smaller particles to be trapped near center .
- 2.Long usage life,can effectively remove the suspending granule,rusts.
- 3.Retains contaminants throughout entire cross section of the filter.
- 4.The stainless steel mesh tube and screw carbon steel punching central mesh tube arepioneered in domestic market.
- 5.The positive weld assures bypass-proof performance and structural integrity without adhesives or additives,maintaining cartridge
- 6.Main material: 304, 304L, 316, 316L stainless steel punching mesh, stainless steel braiding net, stainless steel electric welding mesh, etc.

No.	Product Name	Model	Number
			(pic/ctn)
1	PP Cartridge	10 inch	60
2	PP Cartridge	20 inch	30
3	PP Cartridge	30 inch	25
4	Powered Carbon Cartridge	10 inch	25
5	Powered Carbon Cartridge	20 inch	20
6	Cellulose Cartridge	10 inch	25
7	Cellulose Cartridge	20 inch	20
8	String Wound Filter	10 inch	60
9	String Wound Filter	20 inch	30
10	String Wound Filter	30 inch	30

Water Treatment Filter Media

Uses: water softening, desalination of water preparation, preparation of pure water and high water.

Amino acid extraction and purification, extraction and purification of antibiotics.

Extraction and removal of heavy metal ions, separation and purification of rare earth elements, and organic synthesis reactions, as hydrolysis of the acid esterification catalyst.

No.	Product Name	Model	Weight
			(Bag)
1	Silica Sand	0.5-1/4-8	50kg
2	Activated Carbon		25kg
3	Cation Resin	001X7 (732)	25L
4	Cation Resin	001X7	25L
5	Anion Resin	201X7	25L
6	Cation Resin	C100E	25L
7	Anion Resin	A600	25L
